CABINET CARE & MAINTENANCE

- Prevent direct contact with moisture and wipe dry immediately, should any occur. Should any occur, wipe dry immediately. Allowing moisture to accumulate on, or stay in contact with any wood surface will cause damage. Do not hang wet towels on doors or drawer fronts. Over time, doing so will damage the doors, drawers, and finish.
- To clean wood cabinets, wipe with a damp soft, lint free cloth and immediately dry with a dry soft, lint free cloth. Do not use abrasive, chemical, or ammonia cleaning solutions. Do not use scouring pads on any wood surface. Remove oil or grease deposits with a mild soap, following its directions for dilution.
- Maintain the area climate control, including humidity.
- Do not allow children to swing on doors or to use drawers as step ladders. Bent or twisted hinges and drawer guides usually cannot be repaired. Abuse of cabinet doors and drawers may result in damage to them as well as to the cabinet parts to which they are joined.

Note: Variation in color and grain may differ from actual product.
